

Student Tutoring website Proposal Plan

Tutoring Website Site Map Diagram

Tutoring Website Development Plan

Development Costs: \$600

External Costs: Estimated \$150 (domain, hosting, SSL, external APIs such as Zoom/Stripe/YouTube embedding)

1. Planning & Architecture

User Roles

- **Parents:** Login, view invoices, make payments, book sessions.
- **Students:** Login, see assignments, fun/study links, lesson schedules.
- **Tutors:** Login, track hours taught, see schedules, update content.
- **Admin/CEO:** Manage all content, users, invoices, payments, sessions.

Pages/Features

Student Tutoring website Proposal Plan

Feature	Notes
Send & receive meeting links	Integrate with Google Meet/Zoom API or build scheduler
Lesson reminders	Push notifications or email
Assignment links	Upload PDFs, link to external sites (Twinkl, Scribd, YouTube)
Fun links / Study material	Curated links by tutor/admin
Tutor/student hours	Track hours per session, stored in DB
Amount to be paid / Costs	Private page for parents, protected by login
Invoice page	Auto-generate PDF invoices
Payment link	Integrate with PayPal, Stripe, or bank API
User login	Role-based login (Parents/Students/Tutors)
Tutor photos	Upload/display feature
Customization	Kids' favourite color, interface theme
Chess advert / Brain Gym video	Embed media (YouTube)
Account details	Editable by user; passwords protected
Booking sessions	Calendar + availability check
Currency conversion	Use free API (e.g., exchangeratesapi.io)
Receipts	Auto-generate PDF after payment

2. Technology Stack

Frontend (User Interface)

- HTML, CSS, JS
- Frameworks: Vue.js, React, Next.js
- Styling: TailwindCSS

Backend (Server & Database)

- Node.js + Express.js
- Database: MySQL/PostgreSQL (structured) or MongoDB (document-based)
- Authentication: JWT tokens or sessions (bcrypt for password hashing)

Extras

- Email notifications (Nodemailer)
- Payments (Stripe or PayPal SDK)

Student Tutoring website Proposal Plan

- File uploads (AWS S3 or local storage)
- Calendar (FullCalendar.js)
- PDF generation (pdfkit or jsPDF)

3. Database Design Example

Users Table

| id | name | role | email | password_hash | favorite_color | education_level |

Lessons Table

| id | tutor_id | student_id | date | duration | meeting_link | status |

Payments Table

| id | parent_id | amount | currency | status | invoice_link | date |

Assignments / Links Table

| id | title | type | url | uploaded_by | visible_to |

4. Step-by-Step Implementation Plan

1. Set up the project

- Initialize Node.js + Express backend
- Set up React/Vue frontend
- Connect database

2. Authentication

- Role-based login
- Password hashing & reset functionality

3. Core Features

- Upload assignments, fun links, study materials
- Schedule lessons & reminders
- Track tutor/student hours
- Private pages for payment info & costs

4. Payments & Invoices

- Integrate Stripe/PayPal API
- Generate invoices & receipts
- Store transaction details securely

5. Customization & Media

- Theme/colors selection
- Embed YouTube videos for Brain Gym/Chess

Student Tutoring website Proposal Plan

6. Notifications

- Email notifications for lesson reminders & payments

7. Extra Features

- Currency conversion API
- Session booking for all roles
- Calendar integration

8. Testing & Security

- Protect private routes
- Test role-based access
- Ensure password security & data privacy

5. Hosting

- Frontend + Backend: NGINX
- Database: MongoDB Atlas
- Domain & SSL: Buy domain & use Let's Encrypt

6. User Roles Overview

Role	Access / Permissions
Admin / CEO	Full access: manage users, lessons, payments, invoices, media, site content, booking schedules
Parents	View student info, invoices, costs, payment links, book sessions, pick colors, view reminders
Students	View assignments, fun/study links, lesson schedules, videos, personal stats, pick colors
Tutors	Track hours taught, upload assignments/media, view schedules, manage meetings, notifications

7. Site Map / Page Structure

A. Public Pages

- Home
- Login (role-based)
- Sign Up (optional)

B. Parent Dashboard

- Profile
- Students

Student Tutoring website Proposal Plan

- Schedule
- Payments
- Notifications

C. Student Dashboard

- Profile
- Assignments / Study Material
- Lesson Schedule
- Media

D. Tutor Dashboard

- Profile
- Schedule / Lessons
- Assignments / Links
- Payments
- Notifications

E. Admin / CEO Dashboard

- Users Management
- Content Management
- Payments & Invoices
- Booking Management
- Site Settings

F. Shared Functionalities

- Meeting Links (send/receive, Zoom/Google Meet)
- Notifications (email & dashboard)
- Private Pages (costs, payment info, invoices)
- Media / Videos embedding
- Password Management

8. Navigation Flow

Home → Login → Dashboard (Role-specific)

- Parent: Profile / Students / Schedule / Payments / Notifications
- Student: Profile / Assignments / Schedule / Media
- Tutor: Profile / Schedule / Assignments / Notifications

Student Tutoring website Proposal Plan

- Admin: Users / Content / Payments / Booking / Site Settings
